

VOSH MI just returned from Coya, Peru Jan. 15-25. We saw 669 patients, all of whom received sunglasses. Over 500 patients received either prescriptions glasses or readers, including 103 which were hand-edged onsite. We referred 39 patients for cataract surgery, 3 for strabismus, surgery, 4 for pterygium surgery, 4 for YAG procedures, and 10 various other treatments. We were fortunate enough to return home about 24 hours before the mudslides occurred flooding the valley in which we were in!
